CHANGE YOUR LIFE,
CHANGE YOUR COMMUNITY.

Join the College Partners Program and make a huge impact on someone’s life!

**Goal:** Provide meaningful activities and socialization for a person living with Alzheimer’s or other dementias and provide respite for caregivers.

**How it works:**
- Students visit people receiving supportive care (not hospice care) at a home or facility four hours a week per semester.
- The program coordinator accompanies students on their first visit and provides support throughout their experience.
- Students attend initial orientation training and spend Zoom educational hours monthly with physicians, nurses and other healthcare professionals.
- CDC guidelines followed for everyone’s safety.

**What you give and gain:**
- Improved quality of life for people living with dementia and their caregivers.
- Direct experience interacting with a person with dementia and understanding of dementia through educational sessions.
- A Dementia Training Certificate upon completion of two semesters.
- Letter of recommendation from the program — advanced education programs have accepted applicants partially based on this unique experience.
- Stipend for travel based on eligibility.
- Scholarship opportunities for participation.
